

MOHAMMED AMAAN HASHMI

Test Automation Engineer (SDET)

Mumbai, India | +91 98678 21170 | amaanhashmi25@gmail.com | in/mohammed-amaan-hashmi | github/MohammedAmaanHashmi

PROFESSIONAL SUMMARY

Test Automation Engineer (SDET) with 5+ years of experience in software quality assurance and test automation for US Healthcare applications. Specializes in Playwright, TypeScript, JavaScript, Selenium WebDriver, and Cucumber BDD, with strong expertise in test automation framework design, API testing, regression testing, CI/CD, defect management, and Agile/Scrum delivery. Automated 200+ test cases across a 400+ file Playwright framework, reduced manual regression effort by up to 45%, cut regression cycle time by approximately 30%, and improved test feedback time by approximately 25%.

TECHNICAL SKILLS

Automation: Playwright, TypeScript, JavaScript, Selenium WebDriver, Java, Cucumber BDD, TestNG, Maven, Gradle

Testing: Test Automation Framework Design, End-to-End Testing, Functional Testing, Regression Testing, Smoke Testing, Integration Testing, Cross-Browser Testing, API Testing, REST APIs

CI/CD & DevOps: Jenkins, Continuous Integration, Docker, Git, GitHub, Bitbucket, SourceTree

Database & Cloud: MySQL, AWS

Tools & Practices: Postman, JIRA, Confluence, Agile/Scrum, SDLC, STLC, Quality Assurance, Defect Management, Test Strategy, Test Planning, Root Cause Analysis, Code Reviews

AI Tools: GitHub Copilot, OpenAI Codex, Claude, Generative AI, Prompt Engineering, MCP Servers

Domain: US Healthcare, Healthcare Insurance

PROFESSIONAL EXPERIENCE

Test Automation Engineer (SDET)

Jan 2023 – Present

eClinicalWorks, Mumbai, India

- Drive end-to-end test automation for US Healthcare product suites using Playwright, TypeScript, and JavaScript, reducing manual regression effort by up to 45% and regression cycle time by approximately 30%.
- Designed and implemented automated tests for 200+ test cases covering functional, regression, smoke, end-to-end, and cross-browser scenarios across healthcare product workflows.
- Contribute to a scalable Playwright test automation framework and serve as primary pull request reviewer for a 400+ file test suite, enforcing coding standards, framework consistency, maintainability, and quality assurance.
- Architected and maintained a Java, Selenium WebDriver, and Cucumber BDD regression and compatibility automation suite backed by MySQL.
- Developed and maintained automated test execution and reporting using Maven and TestNG, reducing test execution feedback time by approximately 25%.
- Executed API testing and validation using Postman; collaborated with developers and product owners on defect investigation, root cause analysis, and sprint-level release decisions.
- Used Git, GitHub, Jenkins, Docker, and JIRA within Agile/Scrum workflows for source control, continuous integration, defect tracking, sprint planning, and test execution.
- Leveraged GitHub Copilot, Codex, Claude, and MCP servers to accelerate test case generation, automation scripting, debugging, and root cause analysis.

Software Test Engineer

Sep 2020 – Dec 2022

QualityKiosk Technologies Pvt. Ltd., Mumbai, India

- Developed reusable functional automation test cases using Java and Selenium WebDriver for multiple client applications.
- Executed functional, regression, smoke, and integration testing across SDLC stages, supporting defect identification, analysis, reporting, verification, and release quality.
- Reported critical defects from a business-impact perspective, improving defect prioritization and contributing to an approximately 20% reduction in production escalations.

EDUCATION

B.E. Electronics & Telecommunication — Mumbai University | 2016 – 2019 | CGPA: 7.45

Diploma in Electronics & Telecommunication — MSBTE | 2013 – 2016 | Cumulative: 78.47%

CERTIFICATIONS

ISTQB Certified Tester Foundation Level (CTFL) | ISTQB Agile Tester
